

HAHN
GASFEDERN

In agriculture

GAS SPRINGS · TENSION SPRINGS · OIL DAMPERS

APPLICATIONS

YOU WANT TO SIMPLIFY YOUR WORK -

But you don't know which gas spring to pick for your application?

HAHN IS WITH YOU ALL THE WAY.

From customer-specific support to planning and delivery, with a wide selection of services and a responsive team of employees.

The cooperation with Stabilus immediately expands our service offer. Further the Stabilus IndustryLine gives us the benefit of global networking and new opportunities. This includes the service of individual customer solutions and small series. Of course, all gas springs are developed, produced and supplied in accordance with the highest standards of usual high quality.

IN THE BARN, IN THE FIELD, DURING TRANSPORT: WITH HAHN, YOU ARE ON THE SAFE SIDE.

DECIDEDLY VERSATILE.

A wide selection of durable materials and a diverse range of application-oriented product combinations enable a lasting, maintenance-free and reliable operation. From gas springs to double-stroke springs to tension springs: as a system provider, HAHN has a larger portfolio than almost any other company in the industry.

EXTRAORDINARILY ROBUST.

Rain and snow, extreme heat, dust and dirt, continuous vibration: farming equipment endures a lot of abuse. High-quality parts like wiper ring, clean caps, protection tube or locking devices offer additional protection and make sure that our steel springs continue to do their job – even in the most trying of circumstances.

ABSOLUTELY INDIVIDUAL.

As a manufacturer, we know best which connectors and fittings are the most suitable for the installation of a specific gas spring. Simply tell us about your application and our experts will use our wide selection of accessory parts, made in our factory, to create an individual installation system that will fulfill your requirements.

ANYTHING IS POSSIBLE

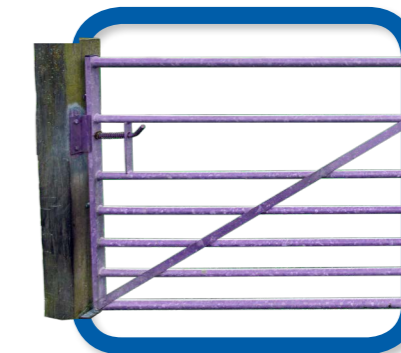

In case you can't find what you need in our portfolio, our experts will create a customized solution for you.

INNUMERABLE APPLICATIONS, ONE GOAL: A SUCCESSFUL HARVEST.

In agriculture, HAHN gas springs are used in areas like controlled movement, gentle damping and braking as well as easy opening and soft closing of levers, flaps and hatches – no matter whether it's under the hood of a mower or in the driver's cab of your tractor. Our gas springs make sure that you can do your job accurately and without effort.

ONE GAS SPRING – UNLIMITED POSSIBILITIES:

- Spraying equipment
- Coiling machines
- Loading ramps of pick-up trucks, livestock trailers
- Milk trucks
- Automated feed scales
- Mounted crop sprayers
- Hatches and doors in driver's cabs
- and much more...

HARDWORKING FARMERS NEED A GOOD SUPPORT SYSTEM: HAHN MAKES HARD WORK EASIER.

For 60 years, HAHN Gasfedern GmbH has been synonymous with sophisticated manufacturing methods, proven materials and professional implementation. As our customers' requirements change, we keep updating and improving our range of services.
