GASFEDERN

# Around the house

GAS SPRINGS · TENSION SPRINGS · OIL DAMPERS  APPLICATIONS

**Outline your requirements and intended use –  
we have the best custom solution for you.**

From the HAHN double-stroke spring for the safe and simple movement of loads to the HAHN SDD, our innovative and award-winning specialists in gentle braking and damping of sliding doors, HAHN gas springs always provide a broad, flexible system – from the actual product to the fittings – that is suitable for every application, even those that appear complex.

● Are you already familiar with our HAHN gas springs, which apply the simple yet clever ballpoint pen principle? Do you know where door stays, door dampers and oil brakes perform best and what benefits our friction springs can offer?

**We would be happy to advise you.**

**HAHN gas springs are used wherever there is a need for controlled movement, opening and closing of flaps and hatches in the house.**

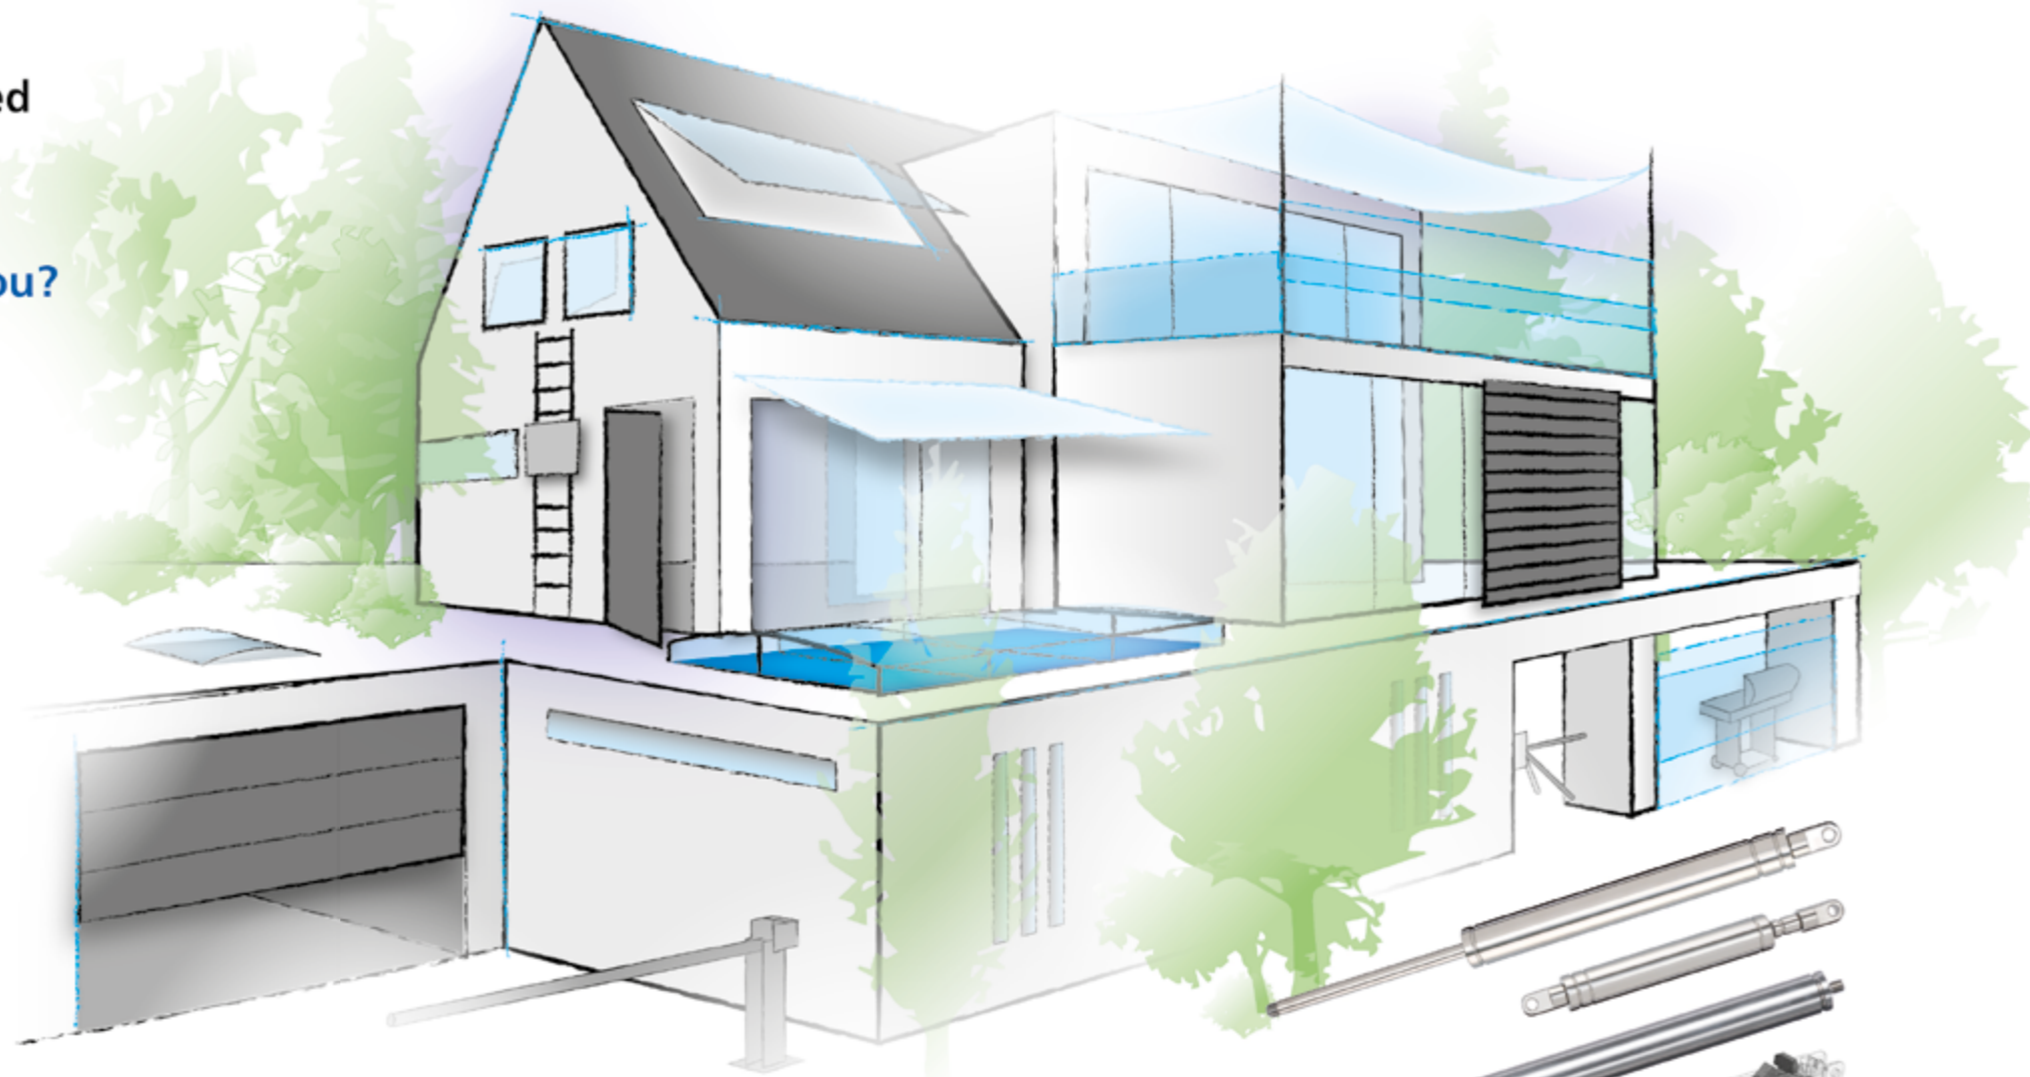

**Which functional solution can we implement for you?**

**Discover HAHN applications:**

- Windows, tilt windows, flaps, hatches
- Canopies (awnings, sun sails, pool)
- Wind and privacy screening
- Doors, sliding doors, garage doors
- Roll-in cabinets, escape hatches, turnstiles

**Make use of the HAHN benefits:**

- Support when opening folding devices
- Easy opening – even under heavy load
- Safe handling and comfortable operation
- Simple positioning
- Flexible adjustment and custom settings
- Wind and weather-resistant
- Gentle closing and degressive braking

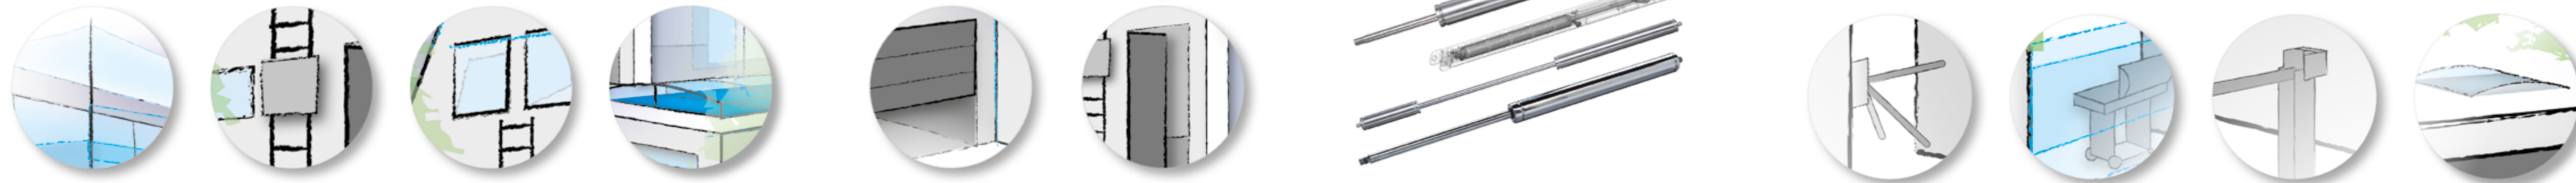

**Get to know our broad product range – from HAHN gas springs to dampers in the most varied of materials, sizes and weight classes.**

**Ask about our indoor and outdoor solutions.**

**Get to know HAHN products:**
