

**HAHN**  
G A S F E D E R N

In the medical technology sector

GAS COMPRESSION SPRINGS · TENSION SPRINGS · DAMPERS  APPLICATIONS

## **Move more together:**

Our experienced employees supervise your project right from the beginning, starting with a needs-based calculation down to extensive consultation, individualized planning and on-time delivery.

And because at HAHN, you get first-class gas tension springs, double-stroke gas springs or blockable gas compression springs as well as all necessary connections from a single source, you benefit from sophisticated solutions tailored to your requirements.

- Let's take a look at your specific application together. Just describe which challenges you are currently facing and we will gladly explain the many possible uses of our products.

**We are there for you.**

Controlled positioning of therapy couches, fitness equipment, etc. – and preferably at the touch of a button?

With HAHN gas springs, you create the best possible starting position for your customers for precise, flexible and efficient work.

**Discover versatile HAHN applications:**

- Therapy couches (head and foot sections, armrests)
- Fitness equipment
- Hospital beds (railings)
- Operating tables
- Monitor arm
- Treatment chairs
- Shower chairs

**Take advantage of numerous HAHN features:**

- Comprehensive consultation
